---

### Munin Centos 6.0

Gezien ik errors had met guides op het internet, hier mijn recentste codelijnen die werken:

As root execute:

```
{codecitation style="brush: bash;"}  
perl -MCPAN -e shell
```

```
{/codecitation}
```

The first time you run this you are interviewed about various things.

Answer the questions, you can probably answer blank on any you do not

understand.

---

You will then be presented with a CPAN prompt (cpan>) . From this

prompt you type:

```
{codecitation style="brush: bash;"}  
cpan> install Time::HiRes
```

```
{/codecitation}
```

You could also do it one at a time like this:

```
{codecitation style="brush: bash;"}  
# perl -MCPAN -e 'install Time::HiRes'
```

```
yum install cpan -y
```

```
rpm -Uvh http://download.fedoraproject.org/pub/epel/6/x86_64/epel-release-6-6.noarch.rpm
```

y

```
um install -y munin munin-node
```

```
{/codecitation}
```

```
/etc/munin/munin.conf:
```

```
dbdir /var/lib/munin htmldir /var/www/html/web/munin logdir /var/log/munin rundir  
/var/run/munin # a simple host tree [enter.yourservernamehere] address 127.0.0.1  
use_node_name yes
```

```
{codecitation style="brush: bash;"}  
chown munin:munin /var/www/html/web/  
munin
```
